## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I, claims 1-23, in the reply filed on January 26, 2006 is acknowledged.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because "said cleaning method" has no antecedent base.

### **Claim Rejections - 35 USC § 103**

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1742

consider the applicability of 35 U.S.C. 103(c ) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 15-27 are rejected under 35 U.S.C. § 103 as being unpatentable over USP 6042898 to Burns et al.

Burns discloses steps of coating, diffusion heat treatment, peening, carbonizing, grit blasting, ionized gas cleaning, and coating. The features relied upon described above can be found in the reference(s) at: col. 3, line 31 to col. 4, line 37 and col. 6, example 2. Burns does not disclose cleaning the workpiece during diffusion heat treatment step and gas flow rate. But, cleaning workpiece at any step is contemplated within ambit of ordinary skill artisan when the workpiece is contaminated. With respect to the gas flow rate that it would have been obvious to one having ordinary skill in the art at the time the invention was made to adjust the gas flow rate in order to balance cost of gas and cleanness of the gas, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 6042898 to Burns et al as applied to claims 15-23 above, and further in view of JP 62139810 (PTO-1449) or JP 2003027209 (PTO-1449).

The Burns reference discloses the features substantially as claimed as set forth in the rejection above except for step of cleaning a furnace. However, JP 62139810 (abstract) or JP 2003027209 (abstract) teaches cleaning a furnace with inert gas in the same field of endeavor or the analogous metallurgical art. Therefore, it would have been obvious to one having ordinary skill in the art of the cited references at the time

Art Unit: 1742

the invention was made to clean a heat treatment furnace as taught by JP 62139810 or JP 2003027209 in order to improve/provide a clean furnace for heat treatment. In re Venner, 120 USPQ 193 (CCPA 1958), In re LaVerne, et al., 108 USPQ 335, and In re Aller, et al., 105 USPQ 233.

## Conclusion

The above rejection relies on the reference(s) for all the teachings expressed in the text(s) of the references and/or one of ordinary skill in the metallurgical art would have reasonably understood or implied from the text(s) of the reference(s). To emphasize certain aspect(s) of the prior art, only specific portion(s) of the text(s) have been pointed out. Each reference as a whole should be reviewed in responding to the rejection, since other sections of the same reference and/or various combination of the cited references may be relied on in future rejection(s) in view of amendment(s).

All recited limitations in the instant claims have been met by the rejections as set forth above.

Applicant is reminded that when amendment and/or revision is required, applicant should therefore specifically point out the support for any amendments made to the disclosure. See 37 C.F.R. § 1.121 and 37 C.F.R. Part §41.37 (c)(1)(v).
